

April 2022 (C CHF)

Active Solar

Long-only fund on the worldwide solar sector

The fund is invested into listed stocks of companies mainly active in the solar photovoltaics industry. Thanks to an active management, the fund's objective is to offer investors the best exposure to this sector in order to benefit from its strong growth.

Bearing a high risk profile (KIID category 7), the fund has very high expected returns. Investment horizon should be mid- to long-term.

Performances over 5 years

Management comments

The negative performance in April was driven by a market correction and by uncertainties on potential new import tariffs in the USA for solar cells and modules originating from South East Asia. The energy crisis triggered by the Russia-Ukraine war will accelerate the global shift to clean energy. The investment thesis relies on two very powerful arguments: Decarbonisation and Energy Security.

The 2022 outlook is very positive:

- ▶ Strong growth of new solar installations that could reach 250 GW (+32%).
- ▶ All countries will review and upgrade their emissions targets to 2030 (following COP26).
- ▶ The valuations are close to historic lows.

The solar sector is mature both from a technological and industrial development perspective. The best companies of the sector will massively increase their revenues and profit by 2025.
