GMP - BEHAVIOUR EUROPEAN EQUITIES (EUR) I Newsletter, 31.07.2022

Strategy

The objective of this sub-fund is to replicate as closely as possible the rising phases of the benchmark index while reducing risk during periods of decline. To achieve this, behavioural finance parameters are used to optimise both the timing of specific and sector-related decisions and the strategic allocations.

Long (130) (nu) (nog (230) (nu)

In July, the market is recovering gradually from the steep losses of June. The sectors at the forefront are Industrials, Technology, Retail and Construction whereas Banks, Basic Resources, Telecom and Auto were the lagging ones Higher PE have tried to recover faster in this environment of interest rates stabilisation. Value stocks were a bit less under demand. The EuroStoxx50 index finished the period with a performance of +7.33 % compared to +3.42 % for the fund. Historical volatility has started do decline on a 100 days basis and stands at 26.2 % for the EuroStoxx50 compared to 23.4 % for the fund

We start to see a rebound of optimism from a very low point. It explains the recent dynamic where many investors complained about what is becoming the most hated rally. European earnings were strong and continue to be revised upward. Valuation for the EuroStoxx50 has rarely been so cheap at 10.8 the next year earnings, only 2009 was cheaper for a few months.
