

Strategy

The objective of this sub-fund is to replicate as closely as possible the rising phases of the benchmark index while reducing risk during periods of decline. To achieve this, behavioural finance parameters are used to optimise both the timing of specific and sector-related decisions and the strategic allocations.

Fund manager comment

At the end of September, we increased the exposure of the fund near its maximum to profit from an expected recovery in the equity markets. Our behavioural indicators were at an extreme depressed level. On a sector basis, Food&Beverages and Telecom were underperforming sectors like Chemicals, Industrials, Media, Energy and Travel&Leisure.

The EuroStoxx50 index finished the period with a performance of +9.02 % compared to +9.59 % for the fund. Historical volatility remained stable on a 100 days basis at 20.55 % for the EuroStoxx50 compared to 21.88 % for the fund.

After this strong move, we decided to reduce the risk by taking some profits and by implementing again on a short-term basis some hedging. This has brought the Equity exposure to 70.5 % down from 95 % at the beginning of the period.
