

This document is a marketing material for Institutional Investors.

Investors should read the PRIIPS KID document

Strategy

The objective of this sub-fund is to replicate as closely as possible the rising phases of the market while reducing risk during periods of decline. To achieve this, **behavioural finance** parameters are used to optimise both the timing of specific and sector-related decisions and the strategic allocations.

Fund manager comment

Against a backdrop of economic slowdown, markets prefer to believe that as rates could be cut, this could be immediately beneficial to the recovery scenario and for the equity markets especially. As result, September's performance is fairly solid with the help of cyclical sectors.

As measured by the EuroStoxx50 index, the market ended the month with + 3.33 % compared with - 0.67 % for the fund. On the volatility side, the 100-days average fell sharply from 20.9 % for the index to 13.03 % compared to an even much lower level of 7.32 % for the fund.

From a sector perspective, we noticed a clear overperformance for cyclicals as Basic resources, Retail or Industrials and Technology while on the underperforming side we find sectors like Food&Beverage, Travel&Leisure, Chemicals, Auto. Pharma.

In a context where politics remain a big factor reducing visibility and where the real economy is continuing to slow down, we are waiting for more clarity, especially with the publication of 3rd quarter earnings. Exposure remains protected via put options as a way to control risk and volatility.
